

**PRICING SUPPLEMENT DATED March 19, 2009  
(To Offering Circular dated July 22, 2008)**

**\$1,000,000,000**

**Freddie Mac**

**GLOBAL DEBT FACILITY  
Variable Rate Debt Securities Due March 9, 2011**

This Pricing Supplement relates to the Debt Securities of the Federal Home Loan Mortgage Corporation ("Freddie Mac") described below and should be read in conjunction with the Offering Circular dated July 22, 2008 and all Incorporated Documents including Freddie Mac's Registration Statement on Form 10 filed with the Securities and Exchange Commission and declared effective on July 18, 2008. Capitalized terms used in this Pricing Supplement and not otherwise defined in this Pricing Supplement have the meanings given to them in the Offering Circular.

The Medium-Term Notes have the same terms (other than Issue Date and Issue Price) as, and form a single series with, the Variable Rate Medium-Term Notes Due March 9, 2011 that Freddie Mac issued in the principal amount of \$3,000,000,000 on March 9, 2009 and the principal amount of \$2,000,000,000 on March 11, 2009. The aggregate principal amount of the Variable Rate Medium-Term Notes Due March 9, 2011, including the Medium-Term Notes issued pursuant to this Pricing Supplement, will be \$6,000,000,000. See "Description of the Debt Securities – Term Debt Securities – Reopened Issues" and "– Maturity, Redemption and Optional Repayment" in the Offering Circular. Interest on the Medium-Term Notes offered pursuant to this Pricing Supplement will accrue from, and including, March 9, 2009.

The Debt Securities are not suitable investments for all investors. In particular, no investor should purchase the Debt Securities unless the investor understands and is able to bear the yield, market and liquidity risks associated with the Debt Securities. See "Risk Factors - The Debt Securities May Not Be Suitable For You" in the Offering Circular.

**The Debt Securities are obligations of Freddie Mac only. The Debt Securities, including any interest or return of discount on the Debt Securities, are not guaranteed by, and are not debts or obligations of, the United States or any agency or instrumentality of the United States other than Freddie Mac. Because of applicable U.S. securities law exemptions, we have not registered the Debt Securities with any U.S. federal or state securities commission. No U.S. securities commission has reviewed the Offering Circular or this Pricing Supplement.**

**The Debt Securities are not tax-exempt. Non-U.S. owners generally will be subject to the United States federal income and withholding tax unless they establish an exemption.**

**Any discussion of tax issues set forth in this Pricing Supplement and the related Offering Circular was written to support the promotion and marketing of the transactions described in this Pricing Supplement. Such discussion was not intended or written to be used, and it cannot be used, by any person for the purpose of avoiding any tax penalties that may be imposed on such person. Each investor should seek advice based on its particular circumstances from an independent tax advisor.**

### RISK FACTORS

An investment in the Debt Securities entails certain risks not associated with an investment in conventional fixed rate debt securities. See “Risk Factors” generally and “Various Factors Could Adversely Affect the Trading Value and Yield of Your Debt Securities” in the Offering Circular. The interest rate of the Debt Securities will be equal to LIBOR for the Index Currency at the Index Maturity *plus* a Spread of 7 basis

points (+ 0.07 percentage points), subject to the “Interest Rate” provisions above. Investors should consider the risk that the variable interest rate on the Debt Securities may be less than that payable on a conventional fixed rate debt security issued by Freddie Mac at the same time. Because the Debt Securities may not pay a significant amount of interest for extended periods of time, the Debt Securities are not a suitable investment for individuals seeking a steady stream of income.

The secondary market for, and the market value of, the Debt Securities will be affected by a number of factors independent of the creditworthiness of Freddie Mac, including the level and direction of interest rates, the variable rate of interest payable on the Debt Securities, the anticipated level and potential volatility of LIBOR for the Index Currency at the Index Maturity, the method of calculating LIBOR for the Index Currency at the Index Maturity, the time remaining to the maturity of the Debt Securities, the aggregate principal amount of the Debt Securities and the availability of comparable instruments. The level of LIBOR for the Index Currency at the Index Maturity depends on a number of interrelated factors, including economic, financial and political events, over which Freddie Mac has no control. The following table, showing the level of LIBOR for the Index Currency at the Index Maturity in effect for the Hypothetical Determination Dates listed below, illustrates the variability of that rate:

#### **Historical Levels of USD 3-Month LIBOR**

<b>Hypothetical Determination Date</b>	<b>3-Month LIBOR Percentage</b>
3/7/2007	5.34000
6/7/2007	5.36000
9/7/2007	5.73000
12/7/2007	5.14000
3/7/2008	2.93875
6/7/2008	2.69563
9/7/2008	2.81000
12/7/2008	2.19000

The historical experience of 3-Month LIBOR should not be taken as an indication of the future performance of 3-Month LIBOR during the term of the Debt Securities. Fluctuations in the level of 3-Month LIBOR make the Debt Securities interest rates difficult to predict and can result in actual interest rates to investors that are lower than anticipated. In addition, historical interest rates are not necessarily indicative of future interest rates. Fluctuations in interest rates and interest rate trends that have occurred in the past are not necessarily indicative of fluctuations that may occur in the future, which may be wider or narrower than those that have occurred historically.

Investors should have the financial status and, either alone or with a financial advisor, the knowledge and experience in financial and business matters sufficient to evaluate the merits and to bear the risks of investing in the Variable Rate Debt Securities in light of each investors particular circumstances. See “Risk Factors - The Debt Securities May Not Be Suitable For You” and “ - Various Factors Could Adversely Affect the Trading Value and Yield of Your Debt Securities - Variable Rate Debt Securities” in the Offering Circular. Prospective investors also should consult their own tax and legal advisors as to the tax consequences of holding, owning and disposing of the Debt Securities. See “Certain United States Federal Tax Consequences” in the Offering Circular.

#### **CERTAIN UNITED STATES FEDERAL TAX CONSEQUENCES**

For United States federal income tax purposes, the Debt Securities will be part of the same issue as the Variable Rate Debt Securities Due March 9, 2011, issued by Freddie Mac on March 9, 2009 (the “Original Notes”) and March 11, 2009, and will have the same issue date, the same issue price and the same adjusted issue price as the Original Notes.
