

**PRICING SUPPLEMENT DATED November 30, 2011
(to the Offering Circular Dated February 25, 2011)**

\$198,300,000

Freddie Mac

GLOBAL DEBT FACILITY

Zero Coupon Debt Securities Due December 27, 2041

Redeemable periodically, beginning June 27, 2012

This Pricing Supplement relates to the Debt Securities of the Federal Home Loan Mortgage Corporation ("Freddie Mac") described below and should be read in conjunction with the Offering Circular dated February 25, 2011 and all Incorporated Documents including Freddie Mac's Annual Report on Form 10-K for the year ended December 31, 2010, filed with the Securities and Exchange Commission on February 24, 2011. Capitalized terms used in this Pricing Supplement and not otherwise defined in this Pricing Supplement have the meanings given to them in the Offering Circular.

There will be no periodic payments of interest on the Debt Securities. The only scheduled payment that will be made to the holder of the Debt Securities will be made on the Maturity Date or the redemption date, as applicable, in an amount equal to the principal amount of the Debt Securities or the product of the call price for such redemption date and the principal amount of the Debt Securities, as applicable. See "Redemption" herein.

The Debt Securities will be issued with original issue discount. See "Certain United States Federal Tax Consequences - U.S. Owners - Debt Obligations with Original Issue Discount" in the Offering Circular.

The Debt Securities are not suitable investments for all investors. In particular, no investor should purchase the Debt Securities unless the investor understands and is able to bear the redemption, yield, market and liquidity risks associated with the Debt Securities. See "Risk Factors - The Debt Securities May Not Be Suitable For You" in the Offering Circular.

The Debt Securities are obligations of Freddie Mac only. The Debt Securities, including any interest or return of discount on the Debt Securities, are not guaranteed by, and are not debts or obligations of, the United States or any agency or instrumentality of the United States other than Freddie Mac. Because of applicable U.S. securities law exemptions, we have not registered the Debt Securities with any U.S. federal or state securities commission. No U.S. securities commission has reviewed the Offering Circular or this Pricing Supplement.

The Debt Securities are not tax-exempt. Non-U.S. owners generally will be subject to the United States federal income and withholding tax unless they establish an exemption.

Any discussion of tax issues set forth in this Pricing Supplement and the related Offering Circular was written to support the promotion and marketing of the transactions described in this Pricing Supplement. Such discussion was not intended or written to be used, and it cannot be used, by any person for the purpose of avoiding any tax penalties that may be imposed on such person. Each investor should seek advice based on its particular circumstances from an independent tax advisor.

RISK FACTORS

An investment in the Debt Securities entails certain risks not associated with an investment in conventional fixed-rate debt securities that pay interest periodically. While the Debt Securities, if held to maturity or redemption, will provide return of their principal, including return of the accreted value to the optional redemption date, their market value could be adversely affected by changes in prevailing interest rates and the optional redemption feature. This effect on the market value could be magnified in a rising interest rate environment in the case of the Debt Securities due to their relatively long remaining term to maturity. In such an environment, the market value of the Debt Securities generally will fall, which could result in significant losses to investors whose circumstances do not permit them to hold the Debt Securities until maturity. It is also unlikely that Freddie Mac would redeem the Debt Securities in such an interest rate environment, when Freddie Macs' costs of borrowing would be relatively high. On the other hand, in a falling interest rate environment, in which the market value of the Debt Securities generally would rise, it is likely that Freddie Mac would redeem the Debt Securities, when its costs of borrowing would be relatively low; under those circumstances, it is likely that the optional redemption provision would restrict the market value that the Debt Securities otherwise would have. Those factors, combined with the fact that payments on the Debt Securities will be made only at maturity or upon redemption, and not periodically, also could affect the secondary market for and the liquidity of the Debt Securities. Investors therefore should have the financial status and, either alone or with a financial advisor, the knowledge and experience in financial and business matters sufficient to evaluate the merits and to bear the risks of investing in the Debt Securities in light of each investors particular circumstances and should consider whether their circumstances permit them to hold the Debt Securities until maturity, or otherwise to bear the risks of illiquidity, redemption and changes in interest rates. See "Risk Factors" in the Offering Circular.
