

**PRICING SUPPLEMENT DATED June 15, 2016
(to the Offering Circular Dated February 18, 2016)**

\$2,000,000,000

Freddie Mac

GLOBAL DEBT FACILITY

Variable Rate Debt Securities Due December 21, 2017

This Pricing Supplement relates to the Debt Securities of the Federal Home Loan Mortgage Corporation ("Freddie Mac") described below and should be read in conjunction with the Offering Circular dated February 18, 2016 and all Incorporated Documents including Freddie Mac's Annual Report on Form 10-K for the year ended December 31, 2015, filed with the Securities and Exchange Commission on February 18, 2016. Capitalized terms used in this Pricing Supplement and not otherwise defined in this Pricing Supplement have the meanings given to them in the Offering Circular.

The Debt Securities are not suitable investments for all investors. In particular, no investor should purchase the Debt Securities unless the investor understands and is able to bear the yield, market and liquidity risks associated with the Debt Securities. See "Risk Factors - The Debt Securities May Not Be Suitable For You" in the Offering Circular.

The Debt Securities are obligations of Freddie Mac only. The Debt Securities, including any interest or return of discount on the Debt Securities, are not guaranteed by, and are not debts or obligations of, the United States or any agency or instrumentality of the United States other than Freddie Mac. Because of applicable U.S. securities law exemptions, we have not registered the Debt Securities with any U.S. federal or state securities commission. No U.S. securities commission has reviewed the Offering Circular or this Pricing Supplement.

The Debt Securities are not tax-exempt. Non-U.S. owners generally will be subject to the United States federal income and withholding tax unless they establish an exemption.

Certain Debt Securities Terms

1. Title: Variable Rate Debt Securities Due December 21, 2017
2. Form: Book-Entry
3. Specified Payment Currency:

Settlement

1. Settlement Date: June 21, 2016
2. Settlement Basis: Delivery versus Payment
3. Settlement Clearing System: U.S. Federal Reserve Banks
Euroclear
Clearstream, Luxembourg

RISK FACTORS

An investment in the Debt Securities entails certain risks not associated with an investment in conventional fixed rate debt securities. See “Risk Factors” generally and “Various Factors Could Adversely Affect the Trading Value and Yield of Your Debt Securities” in the Offering Circular. The interest rate of the Debt Securities will be equal to LIBOR for the Index Currency at the Index Maturity minus a Spread of 8 basis points (0.08 percentage points), subject to the “Interest Rate” provisions above. Investors should consider the risk that the variable interest rate on the Debt Securities may be less than that payable on a conventional fixed rate debt security issued by Freddie Mac at the same time. Because the Debt Securities may not pay a significant amount of interest for extended periods of time, the Debt Securities are not a suitable investment for individuals seeking a steady stream of income.

The secondary market for, and the market value of, the Debt Securities will be affected by a number of factors independent of the creditworthiness of Freddie Mac, including the level and direction of interest rates, the variable rate of interest payable on the Debt Securities, the anticipated level and potential volatility of the LIBOR Reference Rate, the method of calculating LIBOR for the Index Currency at the Index Maturity, the time remaining to the maturity of the Debt Securities, the aggregate principal amount of the Debt Securities and the availability of comparable instruments. The level of the LIBOR Reference Rate depends on a number of interrelated factors, including economic, financial and political events, over which Freddie Mac has no control. The following graph sets forth the historical level of LIBOR for the Index Currency at the Index Maturity for the period from December, 2015 through June, 2016.

Historical Levels of U.S. dollars 3-Month LIBOR

The historical level of LIBOR for the Index Currency at the Index Maturity should not be taken as an indication of the future performance of the LIBOR Reference Rate during the term of the Debt Securities. Fluctuations in the level of the LIBOR Reference Rate make the Interest Rate of the Debt Securities difficult to predict and can result in actual Interest Rates to investors that are lower than anticipated. In addition, historical interest rates are not necessarily indicative of future interest rates. Fluctuations in interest rates and interest rate trends that have occurred in the past are not necessarily indicative of fluctuations that may occur in the future, which may be wider or narrower than those that have occurred historically. No assurance can be given that the Interest

Rate will be above the Floor on any day of any Interest Payment Period during the term of the Debt Securities. We obtained the information in the graph above from Bloomberg Financial Markets, without independent verification.

Investors should have the financial status and, either alone or with a financial advisor, the knowledge and experience in financial and business matters sufficient to evaluate the merits and to bear the risks of investing in the Variable Rate Debt Securities in light of each investor's particular circumstances. See "Risk Factors - The Debt Securities May Not Be Suitable For You" and " - Various Factors Could Adversely Affect the Trading Value and Yield of Your Debt Securities - Variable Rate Debt Securities" in the Offering Circular. Prospective investors also should consult their own tax and legal advisors as to the tax consequences of holding, owning and disposing of the Debt Securities. See "Certain United States Federal Tax Consequences" in the Offering Circular.
