PRICING SUPPLEMENT DATED November 16, 2017
(to the Offering Circular Dated February 16, 2017)

$295,000,000

Freddie Mac

Variable Rate Medium-Term Notes Due November 21, 2018

Issue Date:	November 21, 2017
Maturity Date:	November 21, 2018
Subject to Redemption:	No
Interest Rate:	See "Description of the Medium-Term Notes" herein
Principal Payment:	At maturity
CUSIP Number:	3134GB4T6

You should read this Pricing Supplement together with Freddie Mac's Global Debt Facility Offering Circular, dated February 16, 2017 (the "Offering Circular"), and all documents that are incorporated by reference in the Offering Circular, which contain important detailed information about the Medium-Term Notes and Freddie Mac. See "Additional Information" in the Offering Circular. Capitalized terms used in this Pricing Supplement have the meanings we gave them in the Offering Circular, unless we specify otherwise.

The Medium-Term Notes offered pursuant to this Pricing Supplement are complex and highly structured debt securities that may not pay a significant amount of interest for extended periods of time. The Medium-Term Notes are not a suitable investment for individuals seeking a steady stream of income

The Medium-Term Notes may not be suitable investments for you. You should not purchase the Medium-Term Notes unless you understand and are able to bear the yield, market, liquidity and other possible risks associated with the Medium-Term Notes. You should read and evaluate the discussion of risk factors (especially those risk factors that may be particularly relevant to this security) that appears in the Offering Circular under "Risk Factors" before purchasing any of the Medium-Term Notes.

The Medium-Term Notes, including any interest or return of discount on the Medium-Term Notes, are not guaranteed by and are not debts or obligations of the United States or any federal agency or instrumentality other than Freddie Mac.

	Price to Public (1)(2)	Underwriting Discount (2)	Proceeds to Freddie Mac (1)(3)
Per Medium-Term Note	100%	.005%	99.995%
Total	$295,000,000	$14,750	$294,985,250

1. Plus accrued interest, if any, from November 21, 2017.
2. See "Distribution Arrangements" in the Offering Circular.
3. Before deducting expenses payable by Freddie Mac estimated at $1,000.

J.P. Morgan

The Williams Capital Group, L.P.

DESCRIPTION OF THE MEDIUM-TERM NOTES

Applicable Interest Rate Index:	LIBOR
Index Currency:	U.S. dollars
Index Maturity:	1-Month
Designated Reuters Page:	LIBOR01
LIBOR Reference Rate:	The rate of LIBOR for the Index Currency at the Index Maturity for the relevant LIBOR Determination Date
Reset Date:	Monthly, on the 21st day of each month
LIBOR Determination Date:	The second London Banking Day preceding the applicable Reset Date
Spread:	13 basis points (0.13 percentage points) subject to "Interest Rate" provisions, as described below.
Interest Rate:	LIBOR Reference Rate as defined above, minus the applicable basis points listed above under "Spread", subject to a minimum interest rate of 0.00%. The Interest Rate will be adjusted on each Reset Date to reflect the relevant LIBOR Reference Rate.
Initial Interest Rate:	The initial interest rate for the Medium-Term Notes applicable from, and including, the Issue Date to, but excluding, the first Reset Date, will be equal to LIBOR Reference Rate two London Banking Days prior to the Issue Date, minus 13 basis points, subject to the "Interest Rate" provisions above.
Floor:	0.00%
Denomination:	$1,000 minimum, $1,000 multiples thereafter
Day Count Convention:	Actual/360, with no adjustment for period end dates.
Payment of Interest:	Monthly, in arrears, on the 21st of each month, (each such date, an "Interest Payment Date"), commencing on December 21, 2017.

RISK FACTORS:

An investment in the Medium-Term Notes entails certain risks not associated with an investment in conventional fixed rate debt securities. See "Risk Factors" generally and "Various Factors Could Adversely Affect the Trading Value and Yield of Your Debt Securities" in the Offering Circular. The interest rate of the Medium-Term Notes will be equal to the LIBOR Reference Rate minus a Spread of 13 basis points (0.13 percentage points), subject to the "Interest Rate" provisions above. Investors should consider the risk that the variable interest rate on the Medium-Term Notes may be less than that payable on a conventional fixed rate debt security issued by Freddie Mac at the same time. Because the Medium-Term Notes may not pay a significant amount of interest for extended periods of time, the Medium-Term Notes are not a suitable investment for individuals seeking a steady stream of income.

In a speech on July 27, 2017, Andrew Bailey, the Chief Executive of the Financial Conduct Authority (the "FCA"), announced the FCA's intention to cease sustaining LIBOR after 2021. The FCA has statutory authority to require panel banks to contribute to LIBOR where necessary. The FCA has decided not to ask, or require, that panel banks continue to submit contributions to LIBOR beyond the end of 2021. The FCA has indicated that it expects that the current panel banks will voluntarily sustain LIBOR until the end of 2021. The FCA's intention is that after 2021, it will no longer be necessary for the FCA to ask, or to require, banks to submit contributions to LIBOR. The FCA does not intend to sustain LIBOR through using its influence or legal powers beyond that date. It is possible that LIBOR could continue to be produced on the current basis after 2021, but no assurance can be given that LIBOR will survive in its current form, or at all.

No one can predict the effect of the FCA's decision not to sustain LIBOR, or, if changes are ultimately made to LIBOR, the effect of those changes. If LIBOR in its present form ceases to exist and the provisions in the Offering Circular for determining a fallback rate are found to be unreliable or result in a fallback rate that is not comparable to LIBOR, the definition of LIBOR in the Offering Circular is hereby amended to authorize Freddie Mac as the Calculation Agent to designate an alternative determination method or index to LIBOR. If, prior to the time LIBOR may cease to exist, a new industry standard index is adopted, we may elect, in our sole discretion, to use such standard index in lieu of LIBOR. Freddie Mac's designation of an alternative determination method or index will be final and binding on all parties. No assurances can be given concerning what alternative determination method or index will be chosen by Freddie Mac as Calculation Agent, should this occur. If LIBOR in its current form does not survive or if an alternative determination method or index is chosen, the market value and/or liquidity of the Medium-Term Notes could be adversely effected.

The secondary market for, and the market value of, the Medium-Term Notes will be affected by a number of factors independent of the creditworthiness of Freddie Mac, including the level and direction of interest rates, the variable rate of interest payable on the Medium-Term Notes, the anticipated level and potential volatility of the LIBOR Reference Rate, the method of calculating LIBOR for the Index Currency at the Index Maturity, the time remaining to the maturity of the Medium-Term Notes, the aggregate principal amount of the Medium-Term Notes and the availability of comparable instruments. The level of the LIBOR Reference Rate depends on a number of interrelated factors, including economic, financial and political events, over which Freddie Mac has no control. The following graph sets forth the historical level of LIBOR for the Index Currency at the Index Maturity for the period from November 7, 2016 through November 7, 2017.

Historical Levels of U.S. dollars 1-Month LIBOR

The historical level of LIBOR for the Index Currency at the Index Maturity should not be taken as an indication of the future performance of the LIBOR Reference Rate during the term of the Medium-Term Notes. Fluctuations in the level of the LIBOR Reference Rate make the Medium-Term Notes' interest rates difficult to predict and can result in actual interest rates to investors that are lower than anticipated. In addition, historical interest rates are not necessarily indicative of future interest rates. Fluctuations in interest rates and interest rate trends that have occurred in the past are not necessarily indicative of fluctuations that may occur in the future, which may be wider or narrower than those that have occurred historically. No assurance can be given that the LIBOR Reference Rate will be above the Floor on any day of any Interest Payment Period during the term of the Medium-Term Notes. We obtained the information in the graph above from Bloomberg Financial Markets, without independent verification.

Investors should have the financial status and, either alone or with a financial advisor, the knowledge and experience in financial and business matters sufficient to evaluate the merits and to bear the risks of investing in the Variable Rate Medium-Term Notes in light of each investor's particular circumstances. See "Risk Factors - The Debt Securities May Not Be Suitable For You" and " - Various Factors Could Adversely Affect the Trading Value and Yield of Your Debt Securities - Variable Rate Debt Securities" in the Offering Circular. Prospective investors also should consult their own tax and legal advisors as to the tax consequences of holding, owning and disposing of the Debt Securities. See "Certain United States Federal Tax Consequences" in the Offering Circular.
