Since September 2008, Freddie Mac has been operating in conservatorship, with the Federal Housing Finance

April 2016 Highlights:

- The total mortgage portfolio decreased at an annualized rate of 1.2% in April.
- Single-family refinance loan purchase and guarantee volume was $14.9 billion in April representing
- 57% of total single-family mortgage portfolio purchases or issuances. Relief refinance mortgages comprised
- approximately 8% of our total single-family refinance volume during April.
- Total number of single-family loan modifications were 3,687 in April 2016 and 14,597 for the four months ended
- April 30, 2016.
- The aggregate unpaid principal balance (UPB) of our mortgage-related investments portfolio decreased by
- approximately $6.4 billion in April.
- Freddie Mac mortgage-related securities and other mortgage-related guarantees increased at an annualized rate
- of 3.0% in April.
- Our single-family serious delinquency rate decreased from 1.20% in March to 1.15% in April. Our multifamily delinquency rate remained flat at 0.04% in April.
- The measure of our exposure to changes in portfolio market value (PMV-LS) averaged $7 million in April. Duration gap averaged 6 months.
- Since September 2008, Freddie Mac has been operating in conservatorship, with the Federal Housing Finance
- Agency (FHFA) acting as Conservator.

Duration of 3.0% in April.
- approximately $6.4 billion in April.
- Freddie Mac mortgage-related securities and other mortgage-related guarantees increased at an annualized rate
- of 3.0% in April.
- Our single-family serious delinquency rate decreased from 1.20% in March to 1.15% in April. Our multifamily delinquency rate remained flat at 0.04% in April.
- The measure of our exposure to changes in portfolio market value (PMV-LS) averaged $7 million in April. Duration gap averaged 6 months.
- Since September 2008, Freddie Mac has been operating in conservatorship, with the Federal Housing Finance
- Agency (FHFA) acting as Conservator.

Duration of 3.0% in April.
- approximately $6.4 billion in April.
- Freddie Mac mortgage-related securities and other mortgage-related guarantees increased at an annualized rate
- of 3.0% in April.
- Our single-family serious delinquency rate decreased from 1.20% in March to 1.15% in April. Our multifamily delinquency rate remained flat at 0.04% in April.
- The measure of our exposure to changes in portfolio market value (PMV-LS) averaged $7 million in April. Duration gap averaged 6 months.
- Since September 2008, Freddie Mac has been operating in conservatorship, with the Federal Housing Finance
- Agency (FHFA) acting as Conservator.

Duration of 3.0% in April.
- approximately $6.4 billion in April.
- Freddie Mac mortgage-related securities and other mortgage-related guarantees increased at an annualized rate
- of 3.0% in April.
- Our single-family serious delinquency rate decreased from 1.20% in March to 1.15% in April. Our multifamily delinquency rate remained flat at 0.04% in April.
- The measure of our exposure to changes in portfolio market value (PMV-LS) averaged $7 million in April. Duration gap averaged 6 months.
- Since September 2008, Freddie Mac has been operating in conservatorship, with the Federal Housing Finance
- Agency (FHFA) acting as Conservator.

Duration of 3.0% in April.
- approximately $6.4 billion in April.
- Freddie Mac mortgage-related securities and other mortgage-related guarantees increased at an annualized rate
- of 3.0% in April.
- Our single-family serious delinquency rate decreased from 1.20% in March to 1.15% in April. Our multifamily delinquency rate remained flat at 0.04% in April.

**ENDNOTES**

(1) Purchases of Freddie Mac mortgage-related securities into the mortgage-related investments portfolio totaled $6.2 billion (based on UPB) during April 2016.

(2) As of April 30, 2016, we had net unsettled purchase (sale) agreements of approximately $6.0 billion. The ending balance of our mortgage-related investments portfolio as of April 30, 2016 after giving effect to these unsettled agreements would have been $328 billion.
The activity and balances set forth in Tables 1, 2, 3, 4 and 7 represent unpaid principal balances (UPB), and do not include market valuation adjustments, allowance for loan losses and security impairments, unamortized premiums and discounts, and the impact of consolidation of variable interest entities. In addition, all activity and balances in these tables are presented on a settlement date basis (i.e., exclude amounts that are traded but not yet settled).

**Table 1**

Represents the sum of Freddie Mac mortgage-related securities and other mortgage-related guarantees (Table 4), mortgage loans (Table 3), non-Freddie Mac mortgage-related securities (agency and non-agency) (Table 3) and $3 million of unguaranteed Freddie Mac mortgage-related securities retained by us associated with a credit risk transfer transaction.

- **Purchases or Issuances.** Includes cash purchases of single-family and multifamily mortgage loans, issuances of Freddie Mac mortgage-related securities through our guarantor swap program, issuances of other mortgage-related guarantees, issuances of other securitization products and purchases of non-Freddie Mac mortgage-related securities.
- **Sales.** Includes sales of non-Freddie Mac mortgage-related securities, sales of unguaranteed Freddie Mac mortgage-related securities and sales of mortgage loans.

**Table 2**

Represents mortgage loans and mortgage-related securities held by Freddie Mac. Mortgage-related securities balances reflect security balances and not the balance of underlying mortgage loan collateral.

- **Purchases.** Includes cash purchases of single-family and multifamily mortgage loans, purchases of Freddie Mac and non-Freddie Mac mortgage-related securities from third parties, and additions for seriously delinquent, modified, and balloon/reset mortgage loans purchased out of PC pools.
- **Sales.** Includes sales of Freddie Mac mortgage-related securities (including sales to third parties from the securitization of single-family and multifamily mortgage loans), sales of non-Freddie Mac mortgage-related securities, and sales of mortgage loans.
- **Liquidations.** Represents the total amount of prepayments, curtailments, payoffs, foreclosures, or other repurchases on loans and securities.

**Table 3**

Presents the ending balances of the mortgage-related investments portfolio's four primary components.

- **Freddie Mac mortgage-related securities.** Securities we issue and guarantee that are backed by mortgages.

**Table 4**

- **Issuances.** Consists of: (a) guaranteed securities issued by Freddie Mac where the underlying collateral are mortgage loans or mortgage-backed securities; and (b) other mortgage-related guarantees, which are mortgage-related assets held by third parties for which we provide our guarantee without securitization of those assets. Other mortgage-related guarantees include tax-exempt multifamily housing revenue bonds, HFA bonds, and credit-related commitments with respect to single-family mortgage loans. Excludes any resecuritization activity involving Freddie Mac mortgage-related securities. Notional balances of interest-only strips are excluded because this table is based on UPB.
- **Liquidations.** Represents principal repayments relating to guaranteed Freddie Mac mortgage-related securities and other mortgage-related guarantees. Also includes our purchases of seriously delinquent, modified and balloon/reset mortgage loans out of PC pools.

**Table 5**

Represents the balance and activity of our other debt, based on par values. Includes Reference Bills® securities, discount notes, medium-term notes, securities sold under agreements to repurchase and other secured borrowings, Reference Notes® securities, Structured Agency Credit Risk (STACR) debt notes, and subordinated debt. For more information about Freddie Mac's debt activity, please visit www.freddiemac.com/debt.

**Table 6**

Reflects Freddie Mac’s single-family and multifamily delinquency rates, which are considered mortgage credit performance metrics.

- **Single-Family Serious Delinquency Rate** information is based on the number of mortgage loans that are three monthly payments or more past due or in the process of foreclosure.
- **Multifamily Delinquency Rate** information is based on the UPB of mortgage loans that are two monthly payments or more past due or in the process of foreclosure.
- **Single-Family Credit Enhanced Other**. Consists of Freddie Mac single-family mortgage loans covered by financial arrangements (other than primary mortgage insurance) that are designed to reduce our credit risk exposure, including loans in reference pools covered by STACR debt note transactions as well as other forms of credit protection. STACR debt note transactions transfer a portion of credit risk on certain groups of loans from Freddie Mac to private investors. The value of these transactions to us is dependent on various economic scenarios, and we will primarily benefit from these transactions if we experience significant mortgage loan defaults. The credit enhanced categories are not mutually exclusive as a single loan may be included in both the Primary Mortgage Insurance category and the Other category.

Mortgage loans that have been modified are not counted as seriously delinquent as long as the borrower is less than three monthly payments past due under the modified terms for single-family, and less than two monthly payments past due for multifamily.

Delinquency rates exclude financial guarantees that are backed by either HFA bonds or Ginnie Mae Certificates. For HAMP or non-HAMP modifications, we include loans in a trial period as seriously delinquent until the modification becomes effective.

**Table 7**

Reflects balances of cash and cash equivalents, federal funds sold and securities purchased under agreements to resell, and non-mortgage-related securities.

**Table 8**

- **PMVS and Duration Gap** are our primary interest-rate risk measures. These measures include the impact of our purchases and sales of derivative instruments, which we use to limit our exposure to changes in interest rates.

- Our PMVS measures are estimates of the amount of average potential pre-tax loss in the market value of our financial assets and liabilities due to parallel (PMVS-L) and non-parallel (PMVS-VC) changes in London Interbank Offered Rates (LIBOR). While we believe that our PMVS and duration gap metrics are useful risk management tools, they should be understood as estimates rather than precise measurements. Methodologies employed to calculate interest-rate risk sensitivity disclosures are periodically changed on a prospective basis to reflect improvements in the underlying estimation processes.

The PMVS and duration gap information presented above does not fully reflect the potential effect of negative index values across all of the company’s floating rate assets and liabilities. Because the company manages its interest rate risk exposure on an economic basis to a low level as measured by its models, incorporating these potential effects into the company's process for estimating interest rate risk exposure could result in significant percentage changes in the disclosed duration gap and PMVS levels. However, the company does not believe any such percentage change would represent an exposure to interest-rate risk that would be material to the company’s financial condition or results of operations. The company is evaluating various steps it could take to mitigate this risk.
