

Freddie Mac is offering immediate relief from representations and warranties related to value, condition and marketability of the mortgaged premises, which provides our lenders with greater certainty about the risk of repurchase due to appraisal defects.

This offering uses the Uniform Collateral Data Portal<sup>®</sup> (UCDP<sup>®</sup>) and Freddie Mac Loan Advisor Suite<sup>®</sup> to provide end-to-end feedback regarding collateral rep and warranty relief eligibility as the loan file moves through the loan origination and delivery processes.

Collateral rep and warranty relief may also be offered with Loan Product Advisor's automated collateral evaluation capability which provides the option to waive the appraisal requirements on certain loans. For information on automated collateral evaluation, refer to the [Automated Collateral Evaluation](#) job aid.

## How the Offering Works

To benefit from this offering, you must use the UCDP and Freddie Mac Loan Selling Advisor<sup>SM</sup>. Other Loan Advisor Suite tools support the offering throughout the loan process – from origination through servicing. The tools involved with this offering include:

- **UCDP and Loan Collateral Advisor<sup>®</sup>** - Eligibility for rep and warranty relief begins with the appraisal submission to the UCDP. Loan Collateral Advisor integrates with the UCDP and provides feedback messages on collateral risk and appraisal eligibility for collateral rep and warranty relief.
- **Loan Product Advisor** - Supports the offering by completing an eligibility check and receiving notification of eligibility for collateral rep and warranty relief prior to loan delivery.
- **Loan Quality Advisor<sup>®</sup>** - Supports the offering by validating eligibility with its Collateral Representation and Warranty Relief service. Although its use is optional, Loan Quality Advisor helps to identify potential eligibility and delivery issues throughout the loan process so they can be addressed prior to delivery.
- **Loan Selling Advisor** - At loan delivery, Loan Selling Advisor confirms loan purchase eligibility and collateral rep and warranty relief eligibility.
- **Loan Coverage Advisor<sup>®</sup>** - After delivery and funding, Loan Coverage Advisor documents and tracks the rep and warranty status and dates for the loan.

The following illustration depicts how these tools work together through the phases of origination, delivery and post-settlement tracking of a loan.

## Relevance of the Document File ID/Appraisal Identifier and LP AUS Key

### **Document File ID**

The Document (Doc) File ID is the identifier assigned within UCDP to one or a set of appraisal data files associated with a given property for the loan and identifies the appraisal data file that was uploaded to the UCDP. This Doc File ID does not change, even if you upload appraisal updates as necessary.

In Loan Product Advisor and Loan Selling Advisor, the Doc File ID is known as the Appraisal Identifier and associates the appraisal data file with the loan information:

- If submitting the loan to Loan Product Advisor, the Appraisal Identifier is required with the loan submission to receive notification of loan eligibility for collateral rep and warranty relief in Loan Product Advisor.
- To confirm final eligibility for collateral rep and warranty relief in Loan Selling Advisor, the Appraisal Identifier is required in the loan delivery file.
