

Business Intelligence
Relevant Data

Monitor your loan quality throughout the origination process.

Business Intelligence, a new capability within Loan Advisor Suite, collects loan origination activity data across the Suite and within individual tools for trending and other analysis. You can access Business Intelligence only through the Freddie Mac Loan Advisor Suite portal and individual applications.

Key Features

- Offers pipeline reports, peer comparisons and trending information on your loan origination activity.
- Offers integrated Loan Advisor Suite-level and product-specific data views.
- Provides ability to drill down to specific loan-level details within each report.
- Includes quick, easy-to-understand snapshot summaries of your loan activity data in interactive dashboards.

Key Benefits

- **Usability.** Uses modern data visualization to help you spot trends easily and catch and correct mistakes.
- **Quality.** Monitors the quality of your loans so you can make informed, data-driven improvements to your loan production processes.
- **Efficiency.** Provides relevant information to help you improve your operational efficiency and loan quality.
- **Certainty.** Helps you track and reduce your overall repurchase risk, and enhances your ability to receive representation and warranty relief sooner in the loan manufacturing process.

What's New?

Business Intelligence is now available for Loan Quality Advisor[®]. We'll be adding it for more tools in the future.

Freddie Mac Loan Advisor SuiteSM — it's the future of how we'll do better business together.

Smart. Simple. Trusted.[®]
