

**Coming this summer!**

**Business Intelligence**  
Relevant Data

Monitor your loan quality throughout the origination process.

Business Intelligence, a new capability within Loan Advisor Suite, collects loan activity data across the Suite and within individual tools — such as pipeline reporting, peer comparisons and trending — for analysis. You can access Business Intelligence only through the Freddie Mac Loan Advisor Suite portal and individual applications.

### Key Features

- Offers pipeline reports and trending information on your loan activity.
- In the future, you will be able to view peer comparisons on your loan activity.
- Offers integrated Loan Advisor Suite-level and product-specific data views.
- Provides ability to drill down to specific loan-level details within each report.
- Includes quick, easy-to-understand snapshot summaries of lenders' activity data in interactive dashboards.
- Business Intelligence will be available, with limited coverage when Loan Advisor Suite launches this summer.

### Key Benefits

- **Usability.** Uses modern data visualization to help you spot trends easily and catch and correct mistakes.
- **Quality.** Monitors the quality of your loans so you can make informed, data-driven improvements to your loan production processes.
- **Efficiency.** Helps improve your operational efficiency and loan quality, reducing your repurchase risk and enhancing your ability to receive representation and warranty relief sooner in the loan manufacturing process.

Freddie Mac Loan Advisor Suite<sup>SM</sup> — it's the future of how we'll do better business together.

**Smart. Simple. Trusted.<sup>®</sup>**
