
Subject: UCDP Release Notification – Self-Password Reset Feature

During the weekend of February 24, 2018, Fannie Mae and Freddie Mac (the GSEs) will update the Uniform Collateral Data Portal® (UCDP®) to support **self-password reset**. This feature will allow general UCDP users to reset their own passwords through the UCDP Portal.

Note: The self-password reset feature does not apply to Direct Integration users.

To prepare, the GSEs recommend **UCDP portal users** revisit the “Challenge Response Questions” in their account settings. Please refer to *Section 6.2 Editing Your User Account* in the [UCDP General User Guide](#) for more on editing challenge questions and answers.

Freddie Mac Update

To support future enhancements, Freddie Mac will also include updates to the UCDP to support alphanumeric LP Key values.

Additional Information

Appendix E of the [UCDP General User Guide](#) will be updated on February 26 to provide guidance on the new self-password reset feature. More information to support your ongoing use of the UCDP, including training and resources, is available on the UCDP pages of [FannieMae.com](#) and [FreddieMac.com](#).
