1 Reflects monthly performance data through Sep 30, 2021.

2 Count of loans that prepaid in full or were repurchased prior to default (Zero Balance Code = 01 or 96) divided by Loan Count; partial prepayments (curtailments) are excluded from the calculation

3 Count of loans that were terminated in the dataset due to a non-prepayment default event (Zero Balance Code = 02, 03, 09, or 15) divided by Loan Count

4 Count of active loans, divided by Loan Count

5 Count of loans that were terminated in the dataset due to a non-prepayment default event and subsequently repurchased (Zero Balance Code = 02, 03, 09, or 15 AND populated Defect Settlement Date), divided by Loan Count

6 Count of loans that reached a delinquency status of D120, including at REO Acquisition, divided by loan count.

7 Count of loans that reached a delinquency status of D120, including at REO acquisition, and loans that were terminated in the dataset due to a non-prepayment credit event (Zero Balance Code = 02, 03, 09, or 15) divided by Loan Count.

8 Count of loans that were modified divided by Loan Count. Repeat mods on a loan are not part of the calculation.

9 Count of loans that reached a delinquency status of D180, including at REO Acquisition, divided by Loan Count

10 Count of loans that reached a delinquency status of D180, including at REO Acquisition, and loans that were terminated in the dataset due to a non-prepayment credit event (Zero Balance Code = 02, 03, 09, or 15) divided by Loan Count.

11 Count of loans that were modified at or before a delinquency status of D120 divided by Loan count. Repeat modifications s on a loan are not part of the calculation.

12 Sum of actual loss column for loans with a non-prepayment credit event (zero balance code = 02, 03, 09, or 15).

1 Reflects monthly performance data through June 30, 2021.

2 Calculated by dividing the ZB removal UPB of all prepaid loans (Zero Balance Code = 01 or 96) by the Total Original UPB.

3 Calculated by dividing the sum of the ZB removal UPB by the Total Original UPB. The calculation does not include Prepayments or pre-default Repurchases (Zero Balance Code = 01 or 96).

4 Calculated by dividing the ending UPB of all active loans (for which the Zero Balance Code is null in the terminal record) by the Total Original UPB. The UPB is determined using the priority in Footnote 12.

5 Calculated by dividing the sum of the post-default event repurchase UPB by the Total Original UPB, for loans that were terminated due to a non-prepayment default event (see Footnote 3) and subsequently repurchased (Zero Balance Code = 02, 03, 09, or 15 AND populated Defect Settlement Date).

6 Calculated by dividing the ending UPB of all loans that reached a delinquency status of D120, including at REO Acquisition, by the Total Original UPB. The UPB is determined using the priority in Footnote 12.

7 Calculated by dividing the ending UPB of all loans that reached a delinquency status as of D120, including at REO Acquisition, and loans that were terminated in the dataset due to a non-prepayment credit event (Zero Balance Code = 02, 03, 09, or 15) by the Total Original UPB. The UPB is determined using the priority in Footnote 12.

8 Calculated by dividing the sum of the modification UPB by the Total Original UPB. The modification UPB is the current actual UPB as of the month of modification (modification flag = 'Y'). For repeat modifications, the modification UPB of each is included. The UPB is determined using the priority in Footnote 12.

9 Calculated by dividing the ending UPB of all loans that reached a delinquency status of D180, including at REO Acquisition, by the Total Original UPB. The UPB is determined using the priority in Footnote 12.

10 Calculated by dividing the ending UPB of all loans that reached a delinquency status as of D180, including at REO Acquisition, and loans that were terminated in the dataset due to a non-prepayment credit event (Zero Balance Code = 02, 03, 09, or 15) by the Total Original UPB. The UPB is determined using the priority in Footnote 12.

¹¹ Calculated by dividing the ending UPB of all loans that were modified at or before D120 by the Total Original UPB. Repeat modifications on a loan are not part of the calculation.

¹² If the ending UPB on the terminal record is null, determine the UPB by using the following priority: 1. Use the Current Actual UPB from the previous period; 2. if the Current Actual UPB in the previous period is null, use the Original UPB.
