Full-Year 2014	291,397	(24,203)	(271,749)	(4,555)	1,910,106	(0.2%)	14.2%
Jan 2015	25,310	(1,481)	(25,141)	(1,312)	1,908,794	(0.8%)	15.8%
YTD 2015	\$25,310	(\$1,481)	(\$25,141)	(\$1,312)	\$1,908,794	(0.8%)	15.8%

January 2015 Highlights:

- The total mortgage portfolio decreased at an annualized rate of 0.8% in January.
- Single-family refinance-loan purchase and guarantee volume was \$12.4 billion in January representing 57% of total single-family mortgage portfolio purchases or issuances. Relief refinance mortgages comprised approximately 14% of our total single-family refinance volume during January.
- Total number of loan modifications for January was 4,793.
- The aggregate unpaid principal balance (UPB) of our mortgage-related investments portfolio decreased by approximately \$1.0 billion in January.
- Freddie Mac mortgage-related securities and other guarantee commitments increased at an annualized rate of 1.2% in January.
- Our single-family serious delinquency rate decreased from 1.88% in December to 1.86% in January. Our multifamily delinquency rate decreased from 0.04% in December to 0.03% in January.
- The measure of our exposure to changes in portfolio market value (PMVS-L) averaged \$122 million in January. Duration gap averaged 0 months.
- On September 6, 2008, the Director of the Federal Housing Finance Agency (FHFA) appointed FHFA as Conservator of Freddie Mac.

ENDNOTES

1. The activity and balances set forth in these tables represent UPB. For Freddie Mac mortgage-related securities, the balance reflects security balances based on the monthly PC factor report. Freddie Mac mortgage-related securities include PCs, REMICs and Other Structured Securities, and Other Guarantee Transactions. Effective January 1, 2010, we adopted amendments to the accounting standards for transfers of financial assets and consolidation of VIEs, which resulted in significant changes to our financial statements. However, the information in this monthly volume summary is presented without giving effect to those changes.
2. Total mortgage portfolio (Table 1) is defined as Freddie Mac mortgage-related securities and other guarantee commitments (Table 4) plus the sum of mortgage loans (Table 3) and non-Freddie Mac mortgage-related securities (agency and non-agency) (Table 3).
3. Includes cash purchases of single-family and multifamily mortgage loans, issuances of Freddie Mac mortgage-related securities through our guarantor swap program, issuances of other guarantee commitments, issuances of other structured securities and purchases of non-Freddie Mac mortgage-related securities.
4. Includes sales of non-Freddie Mac mortgage-related securities and sales of mortgage loans.
5. Includes cash purchases of single-family and multifamily mortgage loans, purchases of Freddie Mac and non-Freddie Mac mortgage-related securities from third parties, and additions for seriously delinquent, modified, and balloon/reset mortgage loans purchased out of PC pools. Purchases of Freddie Mac mortgage-related securities into the mortgage-related investments portfolio totaled \$2,598 million (based on UPB) during January 2015.
6. Includes sales of Freddie Mac mortgage-related securities (including sales to third parties from the securitization of previously purchased single-family and multifamily mortgage loans), sales of non-Freddie Mac mortgage-related securities and sales of mortgage loans.
7. Mortgage purchase agreements reflect trades entered into during the month and include: (a) monthly commitments to purchase mortgage-related securities for our mortgage-related investments portfolio, and (b) the amount of monthly mortgage loan purchase agreements entered into during the month. Our purchase commitments may settle during the same month in which we have entered into the related commitment.
8. Mortgage sale agreements reflect trades entered into during the month and include: (a) monthly commitments to sell mortgage-related securities from our mortgage-related investments portfolio, and (b) the amount of monthly mortgage loan sale agreements entered into during the month. Our sales commitments may settle during the same month in which we have entered into the related commitment.
9. As of January 31, 2015, we had net unsettled purchase (sale) agreements of approximately \$2,768 million. The ending balance of our mortgage-related investments portfolio as of January 31, 2015 after giving effect to these unsettled agreements and assuming we did not enter into any other purchase (sale) agreements after January 31, 2015 would have been \$410 billion.
10. Includes other guarantee commitments, which consist of tax-exempt multifamily housing revenue bonds, HFA bonds, and credit-related commitments with respect to single-family mortgage loans. Excludes any resecuritization activity involving Freddie Mac mortgage-related securities. Notional balances of interest-only strips are excluded because this table is based on UPB.
11. Represents principal repayments relating to loans underlying Freddie Mac mortgage-related securities and other guarantee commitments. Also includes our purchases of seriously delinquent, modified and balloon/reset mortgage loans out of PC pools.
12. The ending balance of Freddie Mac mortgage-related securities and other guarantee commitments (Table 4) differs from the balance of Freddie Mac mortgage-related securities in our annual report on Form 10-K dated February 19, 2015 because Table 4 includes other guarantee commitments described in Endnote 10.
13. Represents the combined balance and activity of our other debt, including securities sold under agreements to repurchase and federal funds purchased, based on the par values of these liabilities.
14. Single-family serious delinquency rate information is based on the number of loans that are three monthly payments or more past due or in the process of foreclosure as of period end while multifamily delinquencies are based on the UPB of mortgage loans that are two monthly payments or more past due or in the process of foreclosure as of period end. Mortgage loans that have been modified are not counted as seriously delinquent as long as the borrower is less than three monthly payments past due under the modified terms for single-family, and less than two monthly payments past due for multifamily. Delinquency rates presented in Table 6 include mortgage loans underlying Other Guarantee Transactions, but exclude financial guarantees that are backed by either HFA bonds or Ginnie Mae Certificates. For HAMP or non-HAMP standard modifications, we include loans in the trial period as seriously delinquent in our statistical reporting, which results in a temporary rise in our serious delinquency rate until the modifications become effective and are removed from seriously delinquent status. The volume of effective modifications impacts our reported serious delinquency rate.
15. On a monthly basis, Freddie Mac publishes pool-level delinquency disclosures on its single-family PC and Giant PC securities on the company's website, www.FreddieMac.com/mbs. These monthly disclosures include for each PC and Giant PC the loan count and associated aggregate UPB for mortgage loans that fall into one of four delinquency groups: 30-59 days delinquent, 60-89 days delinquent, 90-119 days delinquent, and 120 days or more delinquent. Additionally, the monthly disclosures include information about certain seriously delinquent loans purchased by Freddie Mac from each PC and Giant PC. Generally, we purchase these delinquent loans, and thereby extinguish the related PC debt, at the scheduled PC debt payment date, unless the loans proceed to foreclosure transfer, complete a foreclosure alternative or are paid in full by the borrower before such date. As of January 31, 2015, there were approximately \$0.9 billion in UPB of loans that were four monthly payments past due, and that met our criteria to allow for the purchase of delinquent mortgage loans out of PC pools.
16. Consists of Freddie Mac single-family mortgage loans covered by financial arrangements (other than primary mortgage insurance) that are designed to reduce our credit risk exposure, including loans in reference pools of mortgages covered by Structured Agency Credit Risk (STACR) transactions as well as other forms of credit protection. STACR transactions transfer a portion of credit losses that could occur under adverse home price scenarios on certain groups of loans from Freddie Mac to private investors. The credit enhanced categories are not mutually exclusive as a single loan may be included in both the Primary Mortgage Insurance category and the Other category.
17. Other Investments exclude amounts related to consolidated variable-interest entities. The balance includes cash and cash equivalents, federal funds sold and securities purchased under agreements to resell, and non-mortgage-related securities.
18. Our primary interest-rate risk measures are PMVS and duration gap. These measures include the impact of our purchases and sales of derivative instruments, which we use to limit our exposure to changes in interest rates. Our PMVS measures are estimates of the amount of average potential pre-tax loss in the market value of our net assets due to parallel (PMVS-L) and non-parallel (PMVS-YC) changes in London Interbank Offered Rates (LIBOR). While we believe that our PMVS and duration gap metrics are useful risk management tools, they should be understood as estimates rather than precise measurements. Methodologies employed to calculate interest-rate risk sensitivity disclosures are periodically changed on a prospective basis to reflect improvements in the underlying estimation processes.

A glossary of selected Monthly Volume Summary terms is available on the Investor Relations page of our website, www.FreddieMac.com/investors.

The Monthly Volume Summary includes volume and statistical data pertaining to our portfolios. Inquiries should be addressed to our Investor Relations Department, which can be reached by calling (571) 382-4732 or writing to:
